## **Kincumber Showcases Town Online**

**[www.kincumber.nsw.au](http://www.kincumber.nsw.au)**

The Kincumber community on the Central Coast of NSW is the latest to launch a community website under the national Community Geographic Domain Name initiative: [www.kincumber.nsw.au](http://www.kincumber.nsw.au)

The Gosford City Council area has been very proactive in creating community websites for its towns including Copacabana, Wendoree Park, Mangrove Mountain, Hardy's Bay and St Huberts Island who have already launched their community site.

In addition to important local information such as transport, health and education the website features a section about the Kincumber Community Eco Garden where residents can download an application form to apply for a garden plot to grow organic fruit, vegetables and flowers.

According to Kincumber Webmaster Chris Campbell, "kincumber.nsw.au has been designed to keep the community informed on local events and news happening in and around Kincumber and Kincumber South.

"The website contains a comprehensive list of local services, attractions and a business directory. We encourage the community to get involved and continue to give us feed back and information on local news and events."

St Huberts Island resident association president Ron Spratt sees the new community website as a means to celebrate the unique location and further link community communications which have been developed over the years.

The site was created with the help of non profit organisation .au Community Domains (auCD). auCD has been established to help communities across Australia create their own websites including [www.torquay.vic.au](http://www.torquay.vic.au), [www.broome.wa.au](http://www.broome.wa.au) and [www.coffsharbour.nsw.au](http://www.coffsharbour.nsw.au).

To make it easy for Kincumber to get online, the website group used a website building tool called *Community Site in a Box*. .au Community Domains has created this easy to use system so that community members with little to no experience can build there own website - This is free to use until 30<sup>th</sup> June 2010 and includes free hosting.

Applications for a website such as Kincumber is still open; community groups can find all the information they need to apply including requirements online at [www.aucd.org.au](http://www.aucd.org.au) or by contacting .au Community Domains on (03) 9863 8577.
